Subject: Sharing air monitoring data
Date: Wednesday, April 03, 2013 3:52:49 PM

Steve –

Pam and I spoke to Ryan Benefield with ADEQ. Where we left it with him was that we would get him the START3 summary reports to Katherine (ADEQ) as soon as possible for posting to the ADEQ website. He thought that they had all of the Exxon summary sheets. We need to find out where ADH is on the interpretation of the data and provide those to ADEQ for posting. Ideally, ADH's interpretation of the data can accompany the summary sheets (for both Exxon and EPA data) in the future. Of note, the data request is only for air monitoring data within the residential areas. Lastly, please cc all data packages to Philip Turner and Chris Villarreal. Carl has requested that Philip review the data to make sure that there is an EPA review of the data as well. Thanks
